

Career & Technical Education (CTE) Employment Outcomes Survey 2016 Fullerton College

Background

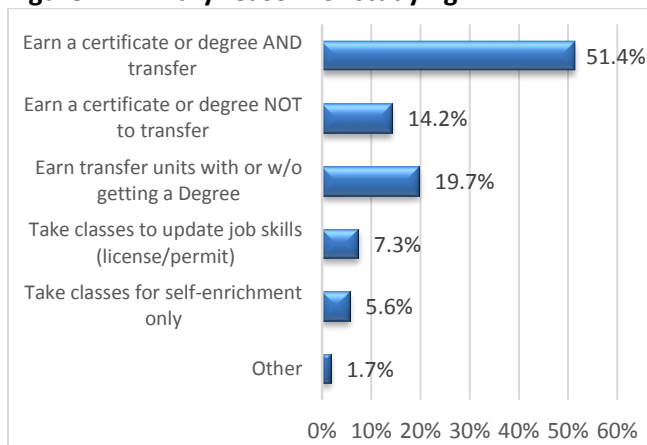

Skills-building students from Fullerton College were surveyed if they met one of the following criteria in 2013-2014, and did not enroll in 2014-2015: earned a certificate of 6 or more units, earned a vocational degree, or earned 9+ CTE units. The survey was administered in early 2016 by e-mail, telephone and US mail. The survey addressed student perceptions of their CTE program, employment outcomes, and how their coursework and training relate to their current career.

A total of 2,,868 students were surveyed and 872 unduplicated students responded, 215 of whom responded by e-mail (24.7%), 588 by telephone (67.4%), and 69 (7.9%) by US Mail, for a total overall response rate of 30.4%.

Results

- Respondents were asked their primary reason for studying at Fullerton College, and the majority (65.6%) indicated earning a certificate or degree (with or without transfer). Figure 1 shows the results.

Figure 1. Primary reason for studying

- Respondents were asked why they stopped taking classes at Fullerton College. Here are the most frequently cited reasons, in rank order of frequency:

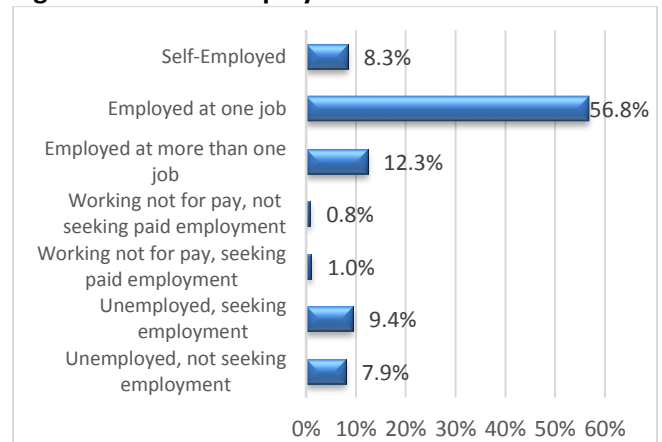

- ✓ My goals were met (388)
- ✓ Transferred to another school (379)
- ✓ I completed the program (344)
- ✓ I got a job (250)

- 49.8% of former students were “very satisfied” with the education and training they received at Fullerton College, and 39.5% were “satisfied” for an overall satisfaction rate of 89.2%.

- 51.7% of respondents indicated they had transferred to another College or University.

- 77.3% of respondents are employed for pay. Figure 2 shows the results.

Figure 2. Current Employment Status

- Overall, statewide, students who transferred have 1.7 times the likelihood of being unemployed and not seeking employment (7.1% for not transferring vs. 12.0% for transferring), likely because they are enrolled at a four year institution.

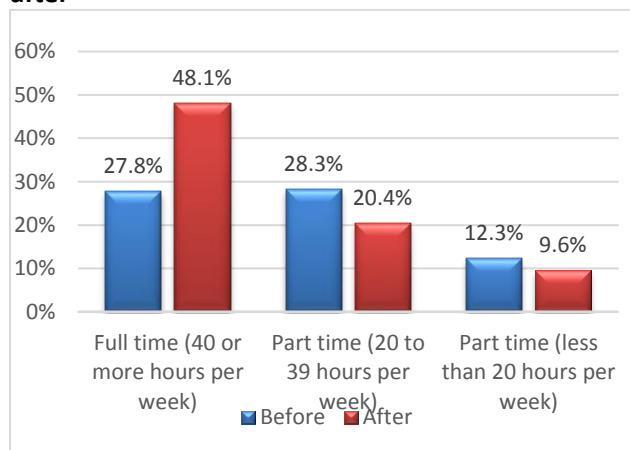

- Respondents were asked, if currently employed, how closely related their job is to their field of study at Fullerton College. 34.0% indicated they are working in the same field as their studies and training, followed by 27.3% indicating they work in a field that is “close” to their studies and training, and 38.7% indicated their job is not related to their studies. When asked if they were actively seeking a job in another field, 6.1% of employed respondents said no.

- Of those respondents who engaged in a job search after finishing their studies, 76.8% reported finding a job and 23.2% were still looking. Of those with a successful job search, 80.2% found a job within six months (68.2% within three months).

- Of currently employed respondents, 20.7% had been employed at their current job less than six months, 16.5% between six months and one year, 22.6% between one and two years, 12.3% between two and three years and 27.5% had been employed at their current job for more than three years.

- Before their studies, 27.8% of respondents worked full time. After completing their studies, 48.1% work full time. Figure 3 shows the results.

Figure 3. Work status before studies/training and after

- The hourly wage of all respondents increased 35.6% from their hourly wage before their studies

(\$14.91) to their hourly wage after completing their studies (\$20.22). Figure 4 shows the results.

Figure 4. Earnings before studies/training and after

- Respondents, including those who had transferred, were asked what impact their coursework had on their employment. Here are the responses, listed in rank order of frequency:

- ✓ No impact on my employment (330)
- ✓ Prepared me for a possible new job (206)
- ✓ Enabled me to learn skills that allowed me to get a job at a new organization (102)
- ✓ Enabled me to learn skills that allowed me to get a promotion at my same organization (65)
- ✓ Enabled me to learn skills that allowed me to stay in my current job (48)
- ✓ Enabled me to start my own business (33)

Summary and Conclusions

The results of the survey showed that completing CTE studies and training – whether or not a credential is earned, whether or not a student transfers – is related to positive employment outcomes. The preponderance of respondents are employed, are working in the same field as their studies or training, and are working full time. Respondents overall posted a 35.6% increase in their hourly wage after completing their studies at Fullerton College and the vast majority were satisfied with the education and training they received.
